Information about the company

Games are a great way for children to interact with the environment. This way, it gets acquainted with the things it is surrounded by, and additionally learns useful skills. Simple manipulations contribute to the child's development: mental, physical and aesthetic. But! Educational games will be beneficial only if you have the right equipment and materials. Let our company take care of this. We sell colorful sorting games, puzzles, fidgeting toys and other toys that our craftsmen make with great love.

Ubee is a family business that we value!

Ubee is not just a company. It is a family business that we run with great pleasure. Our goal is not just to make and sell another toy, but our goal is to make you and your kids happy. Our wish is to give you positive emotions and be useful with the products we put a piece of our soul into.

What types of educational toys do we offer?

Our company makes educational toys that children adore. They are colorful and interesting. Here you will find a lot of different sorting games, which help your baby to learn numbers and letters with ease. It will discover and learn different types of animals and also learn about their babies.

Our games helps with active development of memory and attention, and also mastering necessary skills for the child. Your child can do all of this while having fun! Puzzles, fidgeting toys and sorting games are designed in such a way that the baby can play by itself, giving you the opportunity to relax and spend some time for yourself or taking care of the household.

Educational toys that are suitable for children and meet their age-specific characteristics

Our employees love children and are well aware of their age-specific characteristics. That is why we are able to make useful toys that contribute to the full development of children by playing.

We care about potential risks and hazards and the safety of the products that your children will get into their hands, so we pay special attention to the quality of materials. All game elements are carefully designed and thought through. They have the right design and optimal size for the child.

We want your child to have the most fun and enjoy the toy you purchased from us for as long as possible, that is why we take responsibility for our products. We provide warranty, and the opportunity to exchange the items in case they are defect.

Order vivid, unusual and useful wooden educational toys with delivery to EU countries!

Ubee – We develop the future!

PSF136 | PUZZLE

Ukrainian Cat

Contour Puzzle – an interesting educational game. All pieces can be removed easily by flipping the puzzle over or by taking them out piece by piece using your fingers, while the puzzle's contours (yellow colored) stay in place. Your child's task is to assemble the puzzle correctly – the contours are a great hint.

Size: 33×24 cm

4 823720 030876

PSF131 | PUZZLE

Amazing Animals – 2

Six different cards, which are divided into three parts of an animal – these parts have to be assembled on the board. Each part of one card can be exchanged with with the corresponding part of another card – you can assemble a «fox», but you can also assemble a «panda-fox-sheep». The pieces can be easily removed with your fingers. Use your imagination and mix the puzzle pieces.

Size: 33×24 cm

4 823720 030807

PSF134 | PUZZLE

Collect Animals

Items included: 39 pieces and 13 cards with pictures of animals. Your child's task: Assemble the animal just like on the picture. You can also create your own animals: Just add tiger-ears or a dog-mouth to a cat.

Size: 15×11×6 cm

4 823720 030852

PSF133 | PUZZLE

Purr-fect cats

Do your children adore kittens? Then this game is just for you: 14 cute kittens are waiting to meet your baby. The set includes a hint-guide, helping your baby to find the correct cat using its shadow. When your child gets the hang of it, you can make it a challenge by taking away the guide.

Size: 32×23 cm

PSF052 | SHAPES-PUZZLE | STENCIL

Which pattern belongs to whom?

Take out all stencils with the picture of animals. Tell your child, that the body of the animals can be covered in fur, feathers or scales, which means that each of them has its own pattern. How to play:
1) Throw all pieces onto the board, without paying attention to whether it is correct or not. Ask your child to point out mistakes.
2) Ask your child to pick the correct pattern of each animal. Insert the pieces into the base according to their patterns, while they are flipped over.
Point out one piece, ask your child to guess which animal hid there according to its pattern. Repeat with your child the names of the animals, and tell your child about the habitat of them.

Size: 33×24 cm

Dress the bears

Purchasing this game will let you become the owner of a bear-family! The wardrobe contains 24 sets of clothes. The game will help to explain to your child that there are different types of clothes: men's and women's, outerwear and casual, seasonal (winter and summer). And how many pairs of shoes they have! Slippers, sneakers, shoes, boots, and flip-flops. Like all of us, bears have different moods for different weather. Pay attention to the window in the room (8 pieces in the set), it is there in order to develop logical thinking: if there is a stadium outside of the window, the bears will start to run and you need to give them tracksuits. If it's winter outside, then the bears need to be dressed in warm clothes and put on outerwear for the winter. If it's night outside, then it's time for the bears to go to sleep, so we dress them in pajamas, etc. Learn by playing!
The set includes 65 pieces.
